Idées d'activités

Activité sensoriel:

Créer son poisson avec de la pâte auto-durcissant et des paillettes a fin de reproduire la sensation d'écailles.

Recette: 2 part bicarbonate pour 1 part d'eau et 1 part maizena. A faire chauffer dans une casserole à feu doux, une fois la pâte prête la laisser refroidir avant de s'en servir. Laisser sécher à l'air libre une fois l'œuvre d'art crée. Vous pouvez ajouter des gouttes de l'huile essentielles et du colorant alimentaire dans la pâte afin qu'elle soit plus sensoriel.

Activité STEM:

L'eau qui marche page 6.

Activité physique:

Dès de yoga d'Arc-en-ciel le plus beau poisson des océans. Disponible [ici](#).

Arts plastiques:

Créer un attrape soleil en forme de poisson. En découpant le poisson model de la page 7.

Utiliser une branche de céleri pour faire des empreinte d'écailles de poisson dans sur le model de la page 7.

Coller des gommettes dans le poisson modèle ou en suivant les lignes pages 7.

STEM - L'EAU QUI MARCHE

Matériel:

2 verres

L'eau

Colorant alimentaire bleu

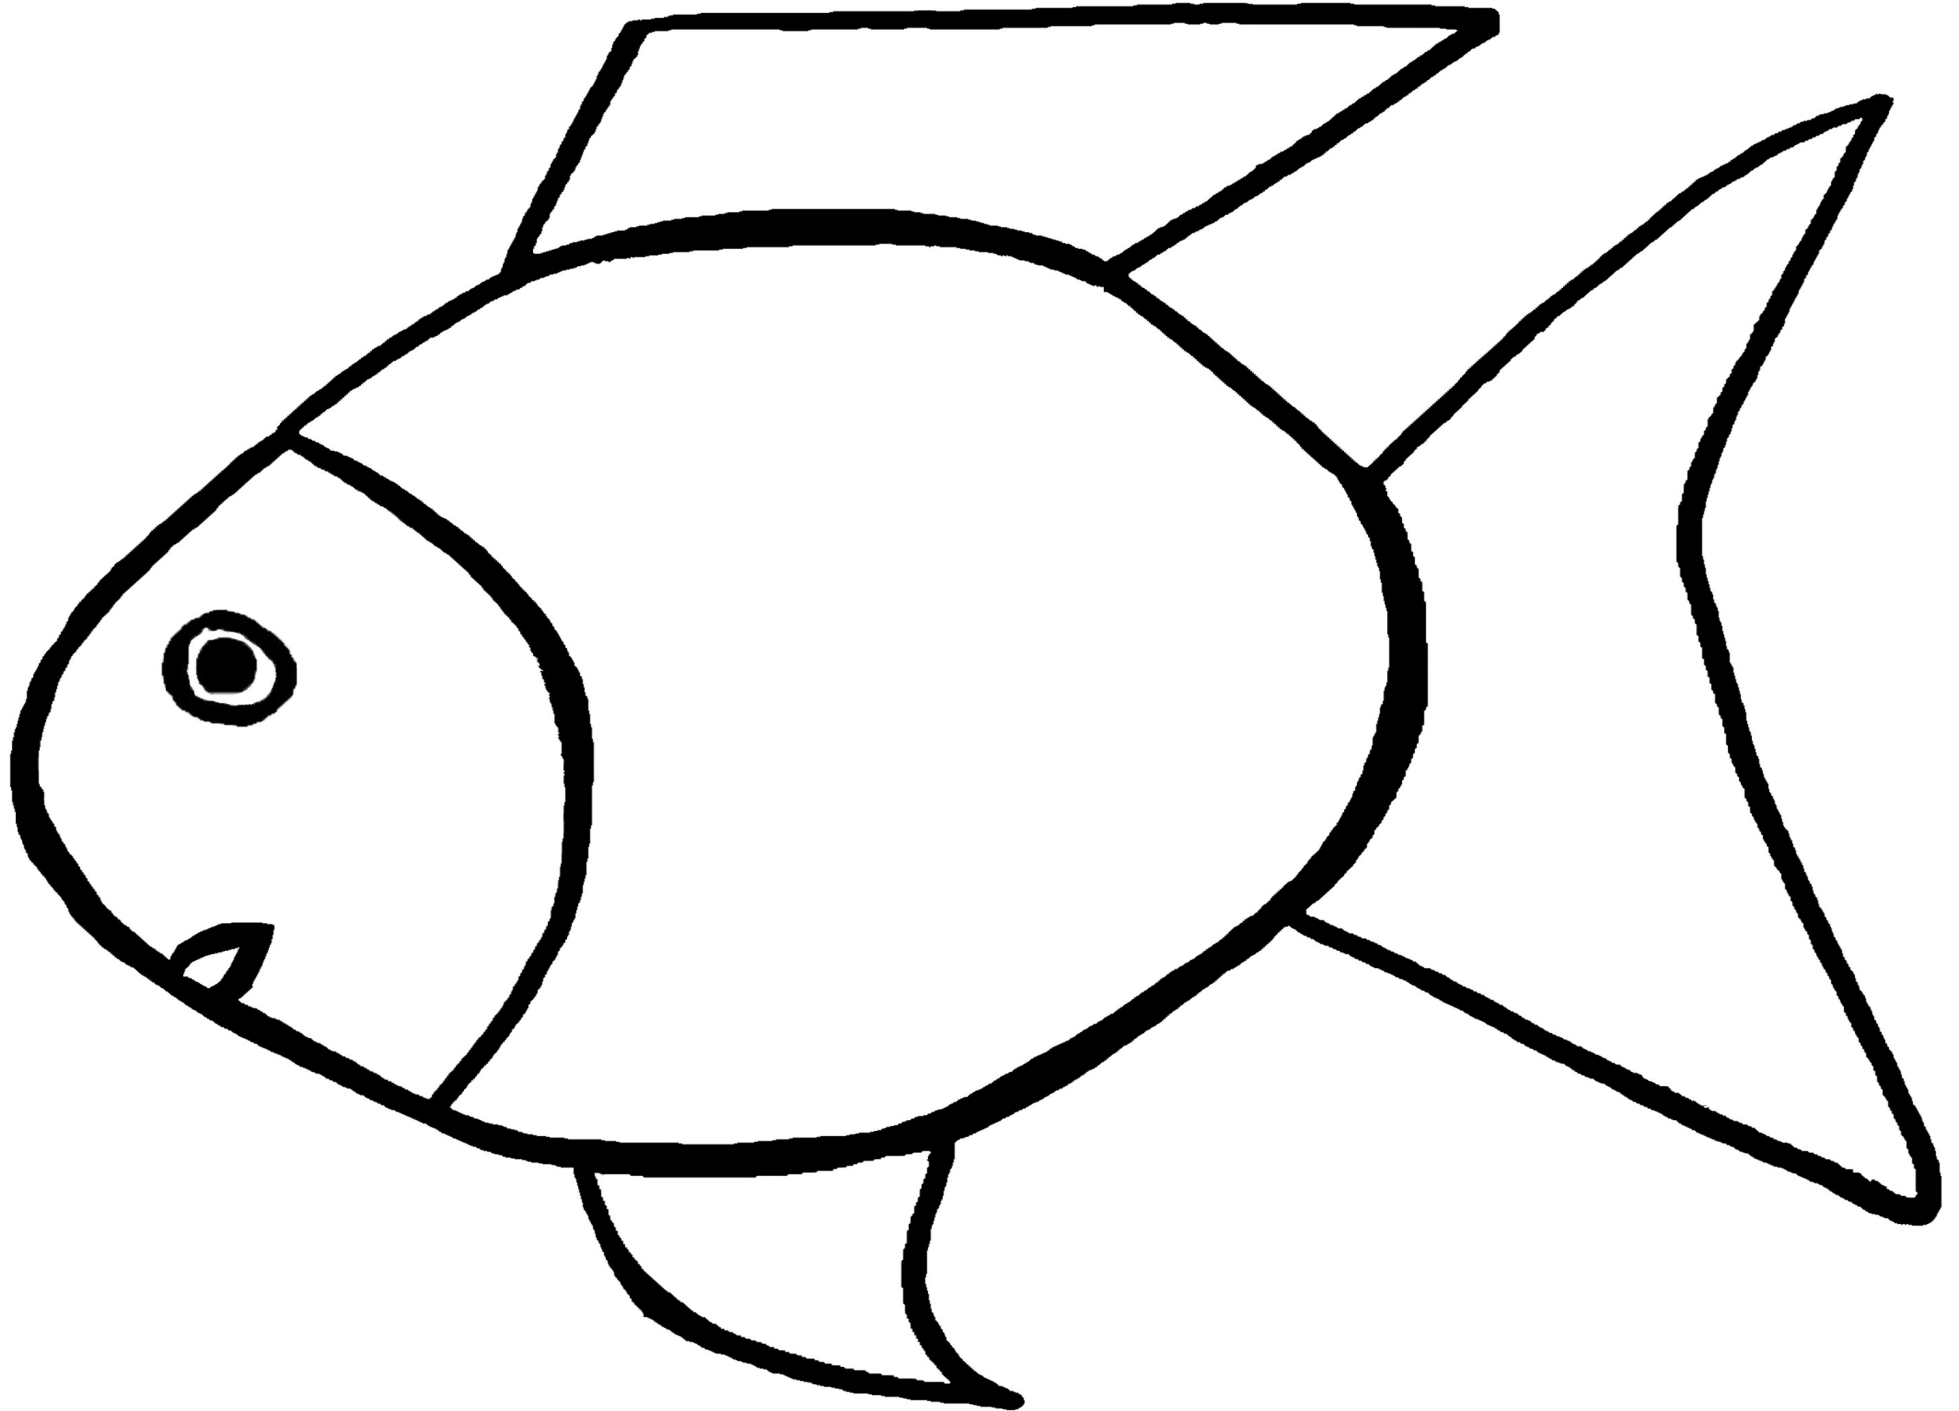

2 feuilles de sopalin

Réalisation:

Placez les verres sur une table avec un peu d'écart, mettez de l'eau avec un peu de colorant alimentaire dans un verre puis pliez du sopalin afin qu'il puisse rentrer facilement dans le verre et faire le pont jusqu'à l'autre verre. Laissez pendant une heure puis revenez pour voir ce qu'il s'est passé.

L'eau va « marcher » avec la fonction capillaire du sopalin., ce qui fait que l'eau va monter sur le sopalin, le traverser pour après atterrir dans l'autre verre. Vous pouvez aussi ajouter un verre de plus, du colorant alimentaire jaune et le poser de l'autre côté du verre vide au départ.
